

## 03 Weight Batching Machine

### ***Application:***

Widely used in fishery & seafood, poultry & meat, vegetable & fruit, snack food, dog food etc.

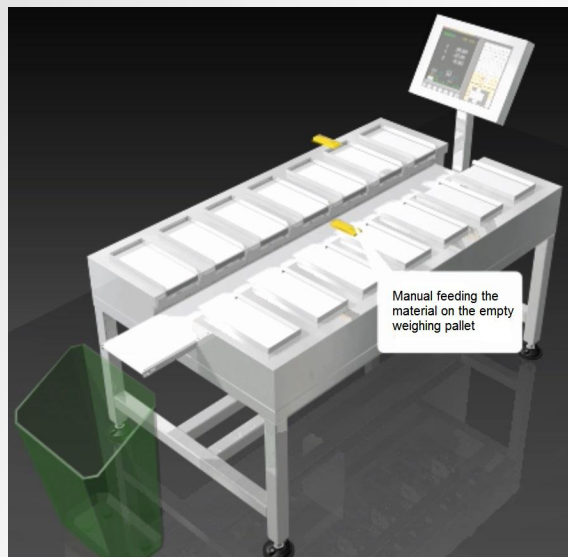

### ***Function:***

Our semi-automatic weight batching machine is mainly used for target weight batching and packing with high accuracy, efficiently replaced the manual weight batching, save the material and increase the batching speed.

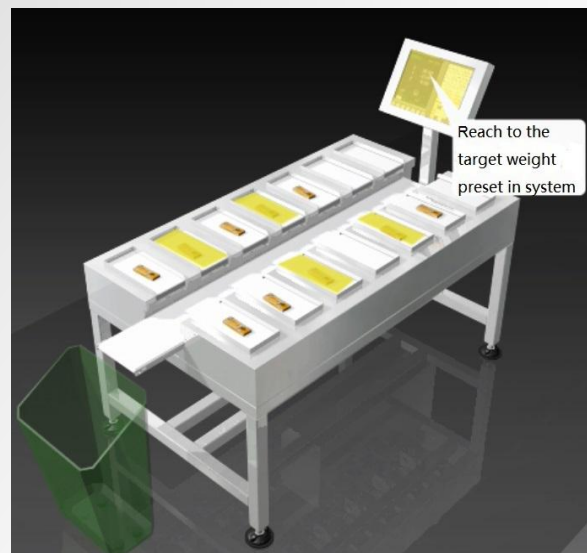

### ***Features:***

1. Humanized structure design, waterproof construction for choice.
2. Quantity of weighing pallets: 14 sets.
3. High precision weighing module and intelligent control system.
4. 3 batching combinations for choice: by weight; by quantity, by weight & quantity
5. 100+ sets of product parameters setting and stored, can be freely switched freely
6. Weighing and batching data output: RS232/485, USB interface, Ethernet, GPRS, WIFI etc.

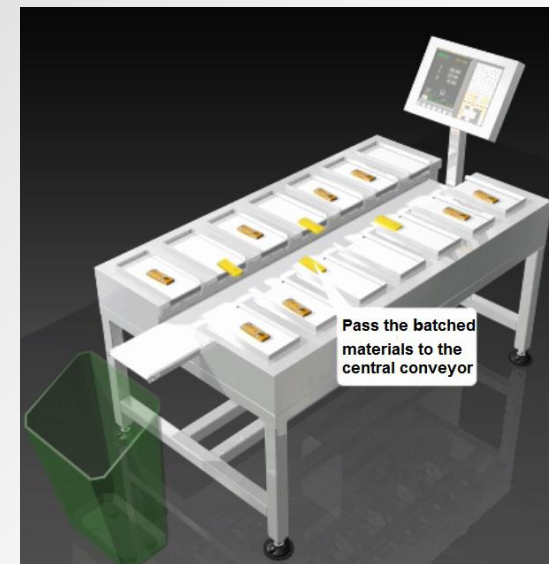

## Step 1 - Feeding

## Step 2 - Batching

## Step 3 - Conveying

*For Fish / Fillet / Vegetable etc.*

Model	DHPZ-400*150-14	DHPZ-500*300-14
Capacity for each weighing pallet	1000g	3000g
Target weight	≤ 5kg	≤ 30kg
Accuracy	±1-3g	±2-50g
Speed	10-40 tims/min	10-30 tims/min
Weighing belt size	L400*W150 mm	L500*W300 mm
Applicable product size	L300*W100 mm	L400*W250 mm
Belt conveyor	Food grade PU belt	
Power supply	AC200-220V, 50/60 Hz	
Control system	Dahang (Independent R & D)	
Construction	SUS304, polishing, waterproof and moistureproof	
Height of conveyor	Customized	
Operation display	14 inches touch screen	
HS code	8423201000	
Package	Professional export plywood case	

**Fish fillet weight batching**

**Dog food weight batching**

**Medicine weight batching**
